

Availability of Data Elements in the 1988-2007 Nationwide Inpatient Sample (NIS)

The first column specifies the HCUP data element name. The second column indicates the file(s) in which the data element appears. The next column describes how the data element is defined in the NIS. The remaining columns refer to data years. Cells marked with "Yes" indicate that the data element is available for that year of the NIS. Cells marked with "--" indicate that the data element is not available for that year of the NIS. Not all data elements are available for all states. For example, all years of the NIS contain the data element for the American Hospital Association hospital identifier (IDNUMBER), but not all states allow the release of this information. Refer to the Description of Data Elements for information on how the HCUP data elements are defined. Summary Statistics are available with means on all numeric data elements and frequency distributions on most categorical data elements.

Availability of Data Elements in the 1988-2007 Nationwide Inpatient Sample (NIS)

The first column specifies the HCUP data element name. The second column indicates the file(s) in which the data element appears. The next column describes how the data element is defined in the NIS. The remaining columns refer to data years. Cells marked with "Yes" indicate that the data element is available for that year of the NIS. Cells marked with "--" indicate that the data element is not available for that year of the NIS. Not all data elements are available for all states. For example, all years of the NIS contain the data element for the American Hospital Association hospital identifier (IDNUMBER), but not all states allow the release of this information. Refer to the Description of Data Elements for information on how the HCUP data elements are defined. Summary Statistics are available with means on all numeric data elements and frequency distributions on most categorical data elements.
